EDUCATION

Singapore University of Technology and Design

Sep 2023 to Present

- Bachelor of Engineering (Engineering Product Design), Robotics
- GPA 4.04/5.0, SUTD Undergraduate Merit Scholarship Holder
- Date of graduate: Sep 2027

National Public School Koramangala, Bengaluru (NPS)

- Class 12: 94.2% (English, Math, Computer Science, Physics, Chemistry)
- Class 10: 96% (English, Science, French, Math, Social Science)

WORK EXPERIENCE

Roar Lab, SUTD

June 2026 to Sep 2026

Robotics Fleet Management Intern

- Designed, tested and implemented an OpenRMF based controller on ROS2 for a fleet of 4 heterogenous robots to complete navigation and delivery tasks in collaboration with Obayashi and BCA Singapore.
- Was involved in the deployment of 3D LiDAR mapping track robot at Obayashi / BCA construction site.
- Final working demo linked [here](#).

Panasonic Research and Development Center Singapore

Sep 2025 to Dec 2025

Computer Vision Intern

- Researched and implemented relightable 3D Gaussian-splatting techniques for 3D reconstruction using Three.js and Unity, culminating in a successful software demonstration at Panasonic's Tokyo headquarters.

ACADEMIC PROJECTS

Microwave Lab, SUTD

June 2026 to Present

Investigator, Project Glucoring / Sugarsafe

- Used CST Microwave Studio to design and manufacture a miniature antenna-based sensing device that wirelessly determines a user's blood sugar level based on reflection and transmission coefficients of 900-1000MHz radiowaves.

Aalto Space Association, Aalto University

Jan 2026 to May 2026

Avionics Team, Project Viikate

- Designed, assembled and programmed a flight controller for a model rocket in collaboration with Aalto Space Association to demonstrate roll control during flight using C++, KiCAD and PlatformIO on a Teensy 4.1 microcontroller. Implemented Kalman filtering and EKF for pose estimation for roll-control algorithms.
- Successfully tested closed loop roll control system in a wind tunnel. Final rocket was launched on May 25th 2026.

SUTD Fabrication Laboratory

June 2025 to Dec 2025

Prototyping Co-Lead, Fablab Guitar Project

- Designed and prototyped a series of electric guitars in collaboration with the SUTD Fabrication Laboratory. Guitars were showcased at SUTD Open House 2026. Guitars were also used for multiple performances. ([Sound Demo.](#)) ([Article.](#))

CO-CURRICULAR ACTIVITIES

SUTD Arts Cluster

Jan 2025 to Present

Arts Cluster Representative

- Liaised with Office of Student Life and 18 student organizations to help run events, increase student engagement with arts CCAs, and maintain sustainable arts at SUTD.
- Project Director for SUTD's [Arts Fiesta 2025 & 2026](#). Negotiated with venues (*SCAPE, Vivo City, Our Tampines Hub), donors, sponsors, and SUTD to run a massively collaborative exhibition style public facing celebration of the Arts from SUTD. Set the art direction and created multiple animated teasers using Blender and Premiere Pro for Arts Fiesta 2026.

SUTD Organization of Autonomous Robots

Jan 2024 to Mar 2025

Software Lead, SUTD SOAR Underwater Unit

Wrote the logic for navigating underwater environments using Computer Vision, masking and contour detection methods. worked as software lead on the project, experimenting with SLAM, Visual Inertial Odometry, and obstacle avoidance techniques. Participated in Singapore Autonomous Underwater Vehicle Challenge (SAUVC) in 2024 and 2025. My team were finalists in SAUVC 2025 and successfully performed our 2 robot tasks in a test run.

SUTD Productions**Jan 2024 to Mar 2025****Creative Vice President**

- Served as creative director of SUTD Productions. Was involved in the filming and production of [several student organisation projects during my time in EXCO.](#)

ADDITIONAL INFORMATION

- Programming: Python, C/C++, JavaScript, HTML
- Libraries: OpenCV, ROS2, Scikit, Tensorflow, Micropython
- Prototyping: Soldering, PCB Design (KiCAD), 3D printing, Laser Cutting, CNC Routing
- Embedded Systems: Raspberry Pi/Pico, Arduino, Jetson, Stereo Cameras ([Portfolio](#))
- Software: Blender, Fusion360, Procreate, Adobe Photoshop, Adobe Illustrator
